Safety Notice

Safety notices to follow before installing or using the POS system

Caution:

- Make sure that the voltage of the power outlet is the same as the voltage that's marked on the outside of the POS system.
- Always keep the power cable properly connected and grounded.
- Keep the POS product in a safe, stable place that's away from heavy or sharp objects.
- Install the POS product in a well-ventilated area and use it in a clean and dry place.
- Make sure your USB flashdrive or disk does not contain viruses before you insert it into the POS product and always back up important files.
- Use the separate power strips specifically designed for this POS system.
- Do not use loose or damaged power cables.
- Do not touch the power plug with wet hands.
- Do not plug in the AC power cord while you are opening the unit to install features or service this POS product.

Warning

- Static may cause damage to the POS.
- Incorrectly replacing a battery can result in an explosion. Make sure to only replace the battery with the same or equivalent type as recommended by the manufacturer (Hisense). Discard used batteries according to the manufacturer's instructions.
- Do not remove the peripheral device before you turn off the system.
- Turn on the system after you turn on peripheral devices and turn off the peripheral devices after you turn off the system

The manufacturer has the right to modify contents of this manual without prior announcements!

Section 1. Introduction

Welcome to the Hisense family!

Welcome to the **Hisense** family! This *Hisense HK870 Series All-in-one POS System Integration Manual* provides steps to install and configure the **Hisense HK870 Series All-in-One Point-of-Sale (POS) System**. In order to install this successfully, you should have an understanding of different programming languages, computer networking, hardware components, application integration and POS systems.

Overview of the Hisense HK870 Series All-in-one POS System

Because we understand that processing sales transactions is an integral part of business, we've designed an all-in-one solution called the **Hisense HK870 Series All-in-one POS System**. This system has a 15" LED light display for the panel, an Intel processor for powerful speed and many other powerful features to meet the business needs of our customers.

Items that were packaged with the POS system

After you unpack the unit, check to ensure the following items are included inside the package:

- HK870 POS System (with base and cable cover)
- Driver CD (including the manual)
- Power adapter (in the base)
- Power cord

Contact information for questions

If any items are missing from the carton box or you have questions, contact Hisense via phone, email or postal mail.

Phone	(86) 532 5575 -1252 (International): Monday through Friday between 9 a.m. to 6 p.m.
Email	infopos@hisense.com
Mailing Address	No.11 Jiangxi Road Qingdao 266071 China
Website address	http://hics.hisense.com

Required tools

You will need a Phillips screwdriver to disassemble the POS in order to access the motherboard.

Section 2. Understanding the HK870 Series POS

Understanding the HK870 Series POS

This section describes the exterior of the POS system, the dimensions at different angles and the input/output ports.

Controls and other Exterior Components

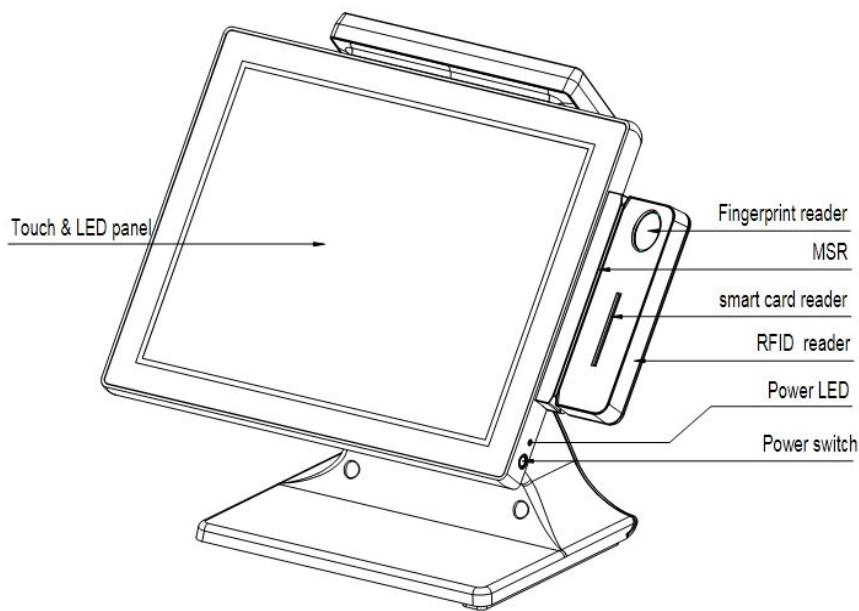

Figure 1. Front view of the HK870 Series POS System

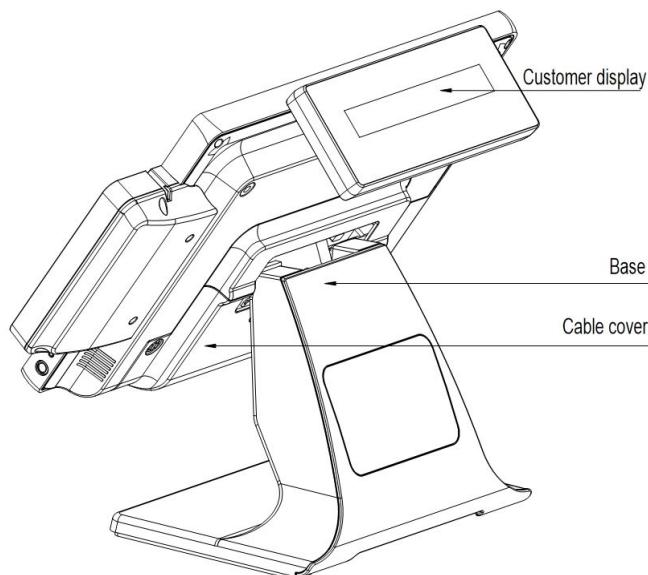

Figure 2. Back view of the HK870 Series POS System

Disclaimer: The exterior design and specifications for this product may be changed without prior notice in order to improve quality.

HK870 POS System dimensions and angles

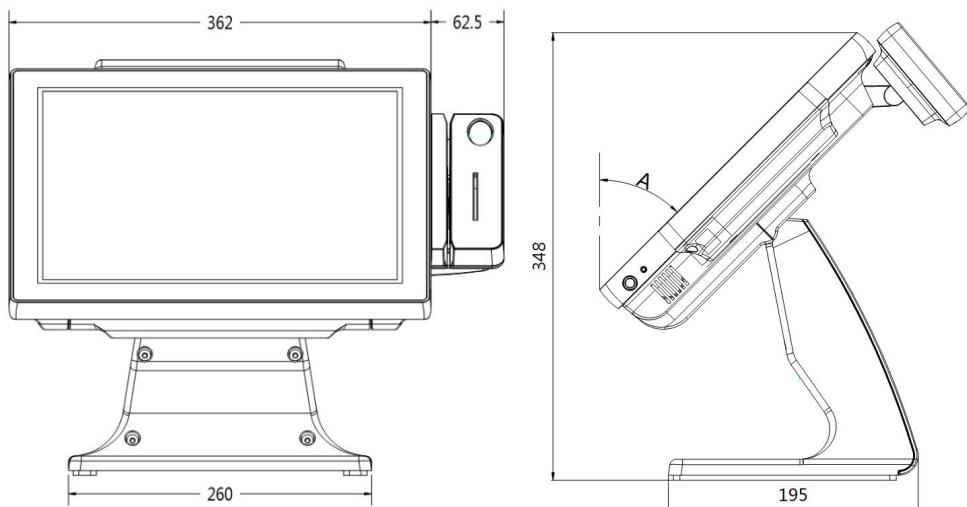

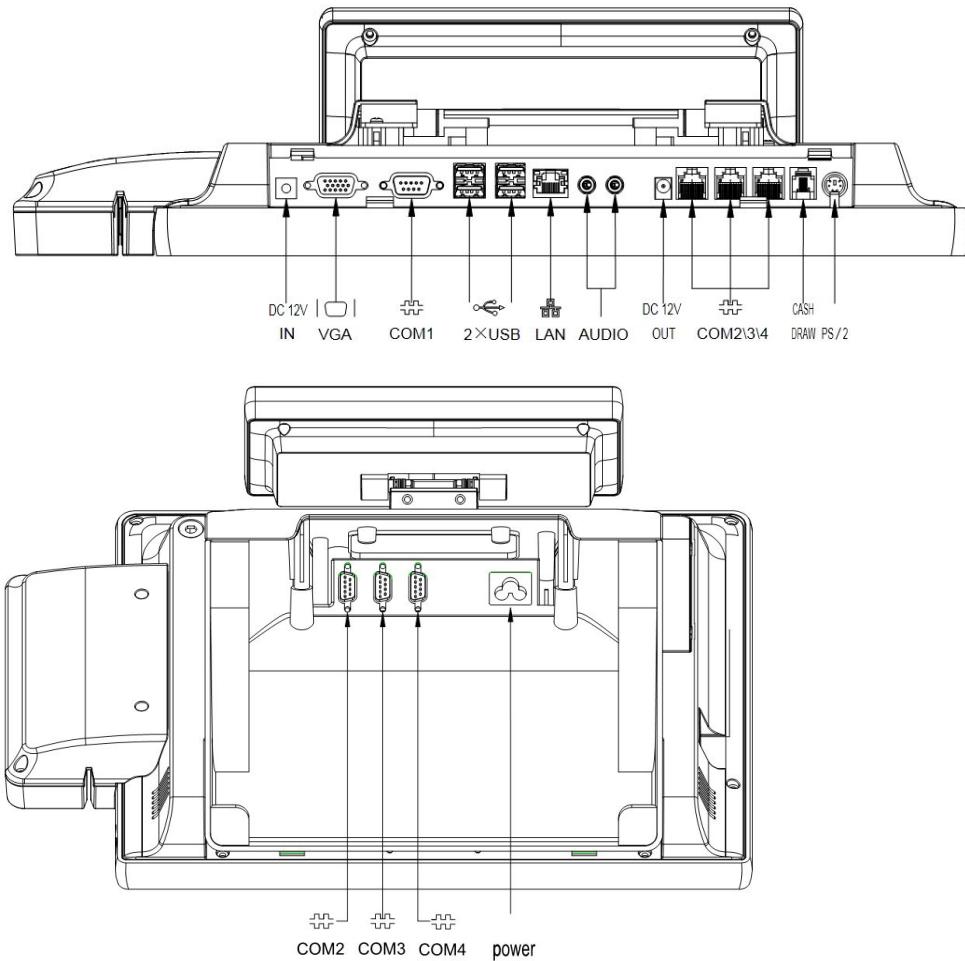

Figure 3. POS dimensions at a fixed angle and with an LCD at a slanted angle

Ports

HK870 (D2550 motherboard) POS system has 16 built-in ports.

HK870E (Baytrail J1900 motherboard) POS system has 15 built-in ports.

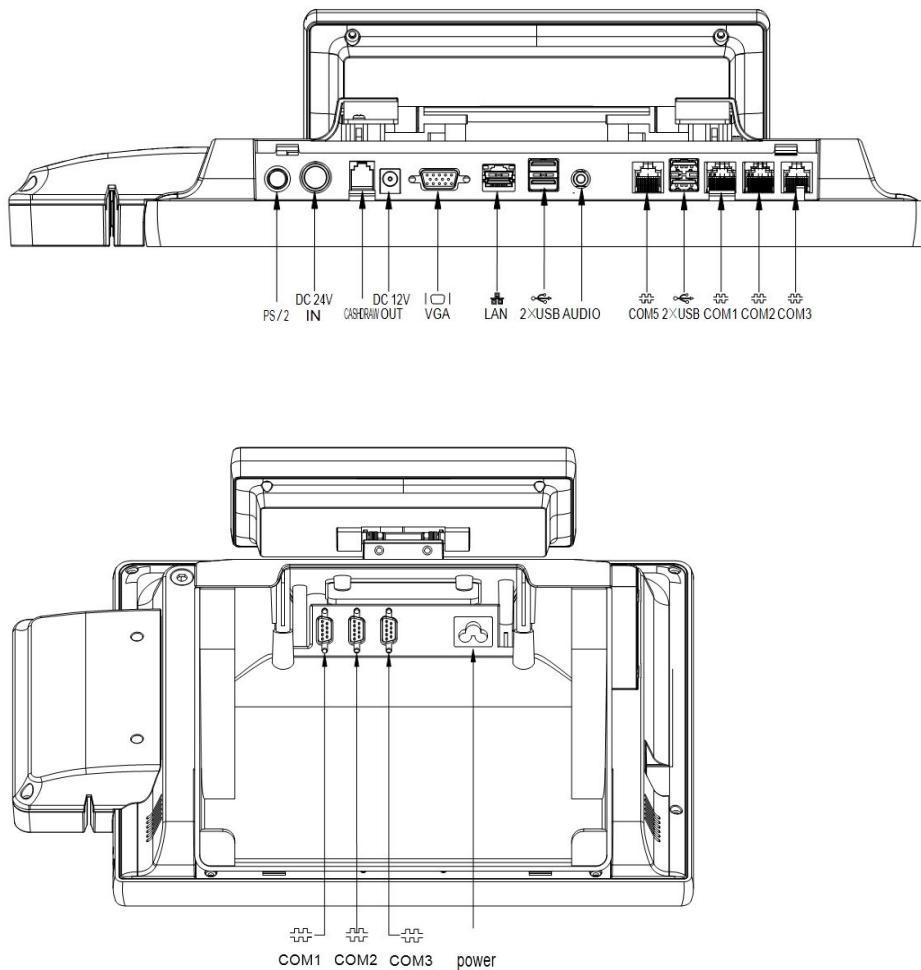

Figure 4 Built-in ports of the POS system

Section 3. Installing the POS System

Installing the POS System

This section provides the steps to install the POS system, connect peripherals and the DC power supply cable.

Finding the right location to install the POS system

It is important to choose a safe and secure place to install the terminal.

- Choose a desk or table big and strong enough to support the weight of the system and peripherals.
- Choose a flat, hard surface. Carpeted area can generate static electricity that can alter memory or damage system components.
- Make sure to install the system in a well-ventilated place and keep the space free around the system.
- Choose appropriate environmental conditions such as cool and dry places. Avoid humid and dusty places. Also avoid direct sunlight, rapidly changing temperatures, or placing the system near heat sources.
- Select the appropriate voltage. Connect all the equipment into an isolated outlet to prevent static electricity and short circuit.
- Choose a location where sufficient power outlets are available for printers and other peripheral devices.
- Do not install the POS system near electromagnetic and electrical devices, such as phones and electric motors, that can cause system damage.
- The socket-outlet should be installed near the equipment and easy to access.

Figure 5. Angle view of the POS system

Connecting Peripherals

To connect peripherals, first remove the [Back cover] that's in the bottom of the system. Next, remove the [Cable arrange cover] located in the rear of the system.

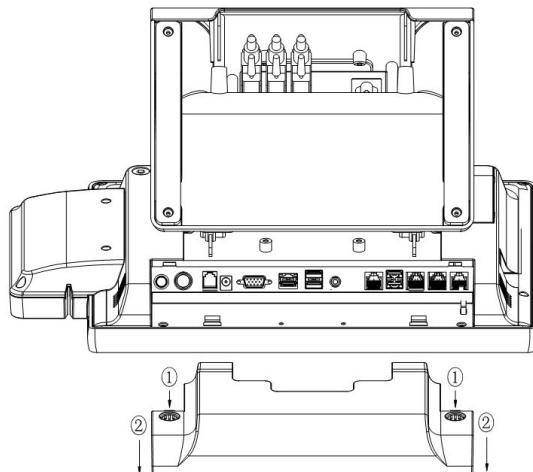

Figure 6. Direction to pull the cover

Connecting a DC power supply cable

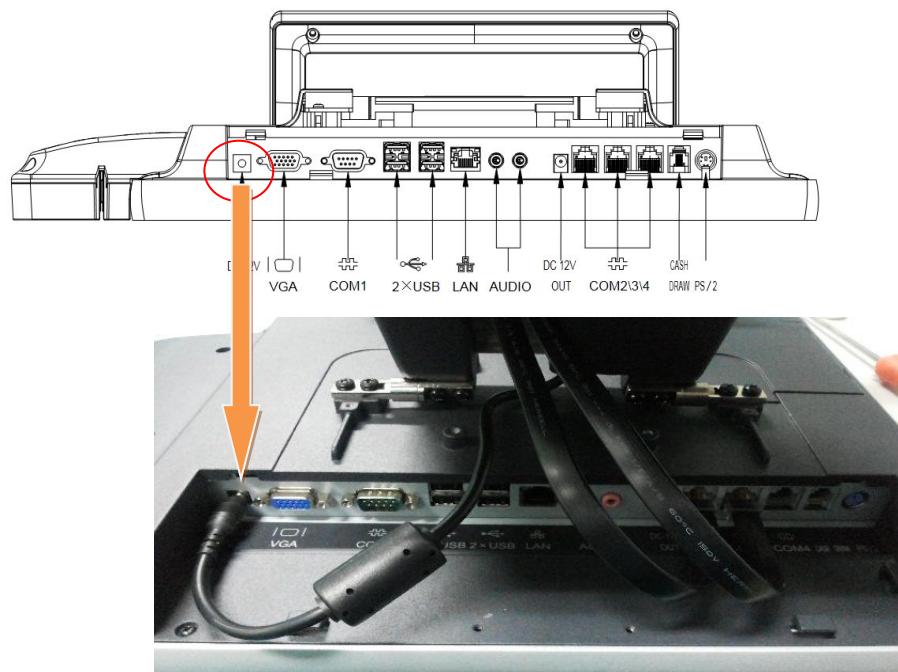

Connect the [DC power cable] to the [DC power input] at the bottom of the system.

Note: You can use a 100V - 240V adapter with this POS system.

⚠ CAUTION

You should only use the manufacturer (Hisense) adapter with this POS system. Hisense will not be held liable for any damages caused by using products made by other manufacturers.

HK870 (D2550 motherboard)

HK870E (Baytrail J1900 motherboard)

Figure 7. DC power supply cable

Section 4. Installing Utility Software

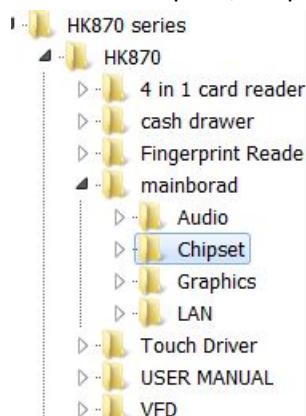

POS Driver and Utility Introduction

This section provides the steps to run the utility software that's needed to install the drivers on the mainboard. The POS drivers and other utilities are located on the CD that came with the system.

Installing software on the HK870 Mainboard

To install the software on the HK870 (D2550) Mainboard

Install the Chipset , Graphics, LAN, Audio in proper sequence on the HK870 system.

To install the software on the HK870E(Baytrail J1900) Mainboard:

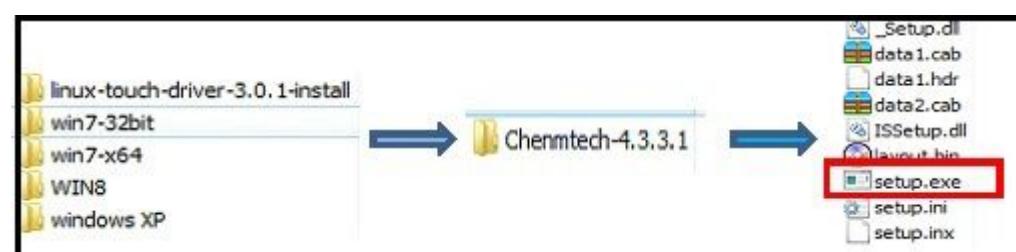

Mainboard

Figure 8. USB3.0 Driver files

Touch Panel

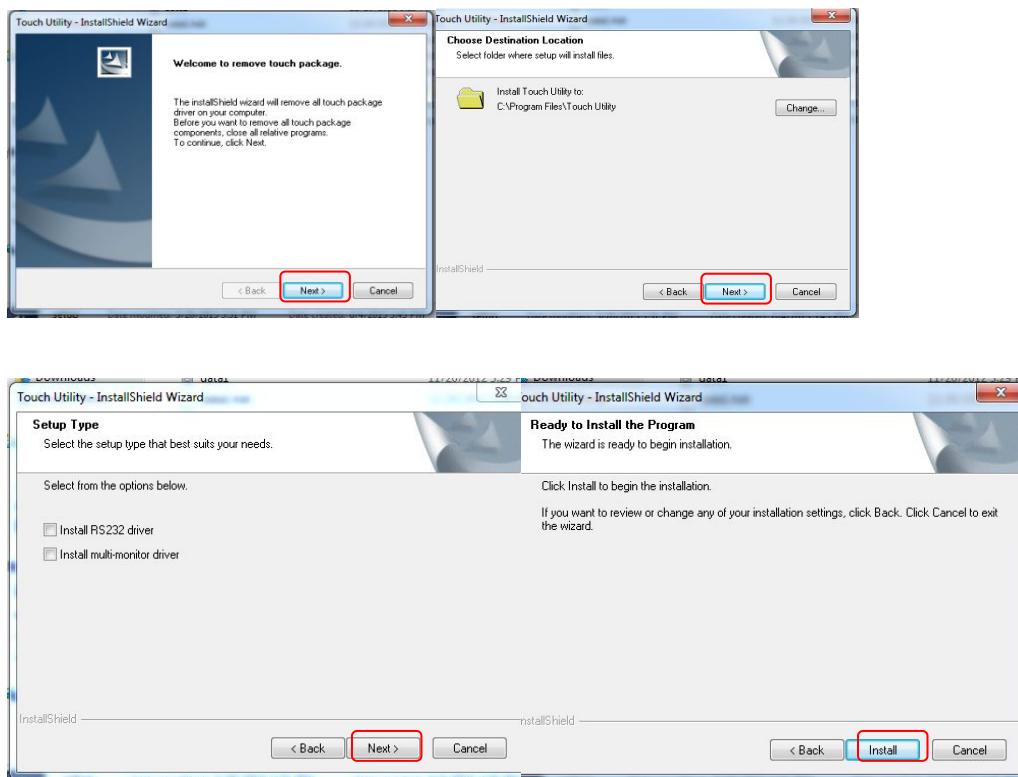

Figure 9. InstallShield Wizard Screenshot

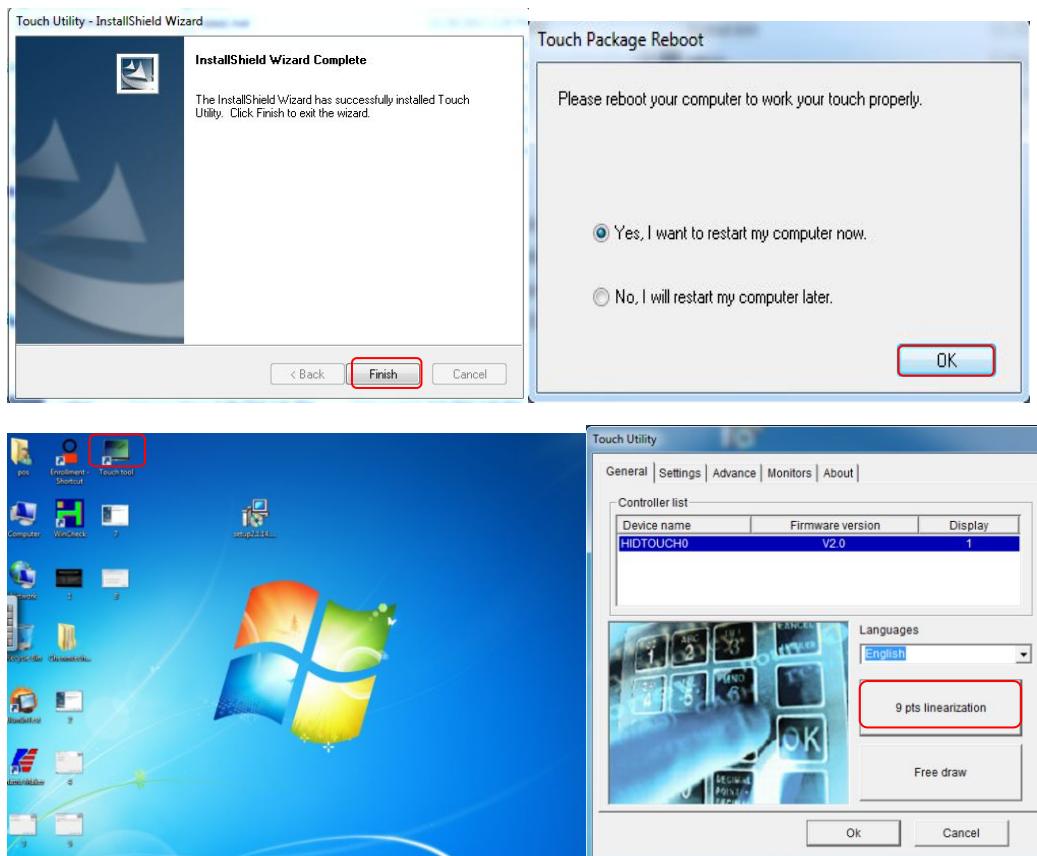

Figure 10. Screenshots of each stage of the install process

Using a Dual Monitor with the POS system

You can use a dual monitor (which is two monitors for one system) with the POS system. You can connect the additional monitor to the [VGA] port. The screen for the sub-monitor can be displayed as a duplication of the main monitor or as an extended screen.

Note: The steps below apply to a Windows 7.

To connect a second monitor:

1. Connect the external monitor when the system is off.
Note: Remove the [Interface cover] at the top of the system to see the VGA connector.
2. Connect a [Power Cable] to the external monitor.
3. Press the [Power] button of the system.
4. Right-click your mouse on the Windows desktop screen and select **Screen resolution** from a pop-up menu.

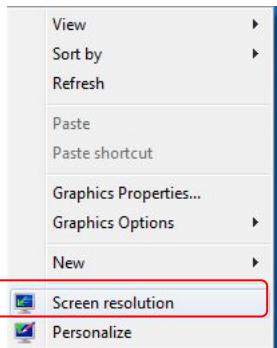

Figure 11. Screen resolution feature

After you select the Screen resolution, the **Change the appearance of your display** dialogue window will appear. The **Display** option is set as '**1|2. Multiple Monitors**' and the **Multiple displays** option is set as '**Duplicate these displays**'.

In figure 12, the dual monitor shows a duplicated screen.

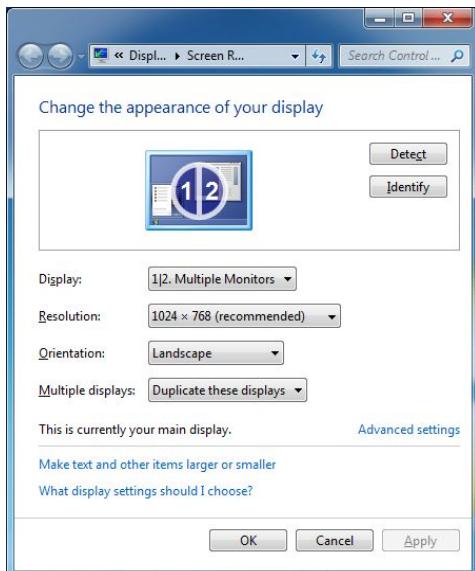

Figure 12. 'Change the appearance of your display' dialogue window

If you want to change to an extended screen, set the **Multiple displays** option to 'Extend these displays' and click "OK". Figure 13 shows where two different extended screen monitors are being used.

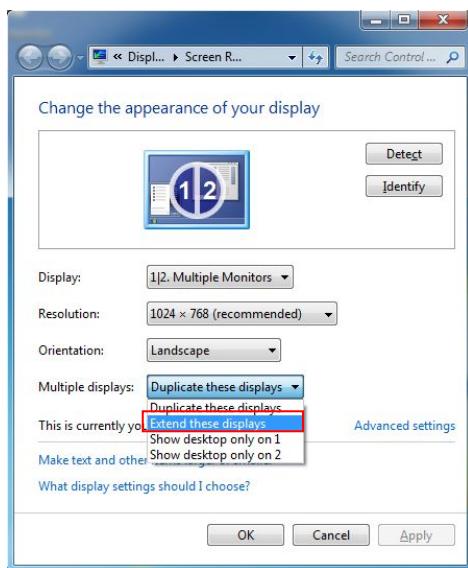

Figure 13. Extend these displays option

5. Click the **Keep changes** button on the ‘Display Settings’ dialog window to keep the current settings.

Figure 14. Display settings window

6. If the configuration is finished, click the **OK** button to close the **Change the appearance of your displays** dialog window.

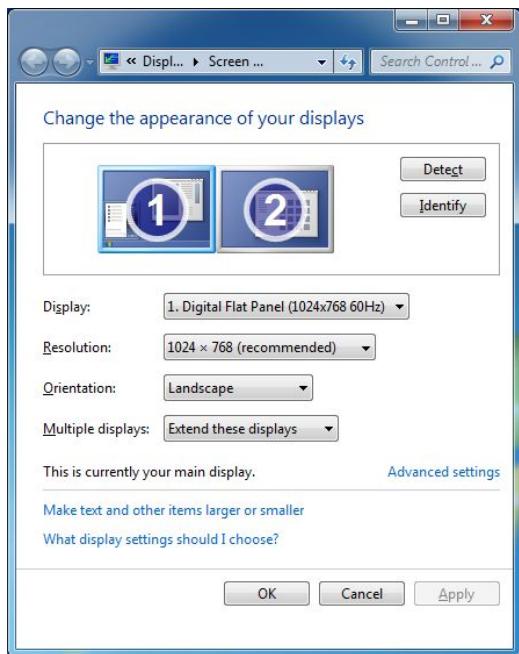

Figure 15. Change the appearance of your displays window

Section 5. Getting familiar with the HK870 motherboards

The HK870 Series is comprised of two different motherboards: HK870 and HK870E.

Section 6. Assembling and Disassembling the POS System

Assembling and disassembling the POS

This section provides the steps to assemble and disassemble the POS system.

1 Remove the Hard Disk Drive (HDD)

- A. To disassemble the POS, first remove the screw of the [HDD cover] and take off the cover.
- B. Pull out the hard disk assembly.

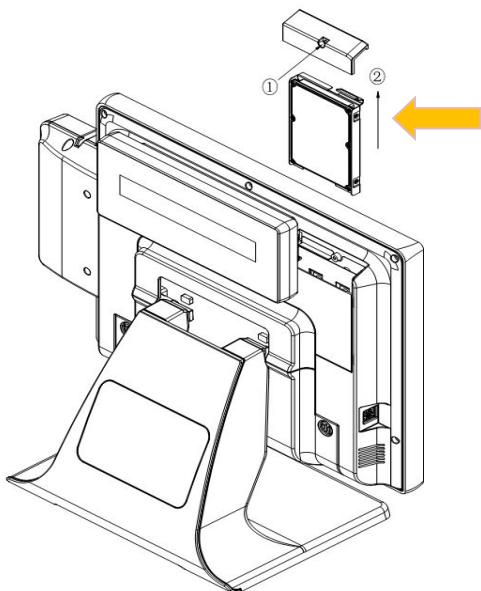

Figure 18. HDD cover to remove

2 Remove the cable cover

- A. Press the switch.

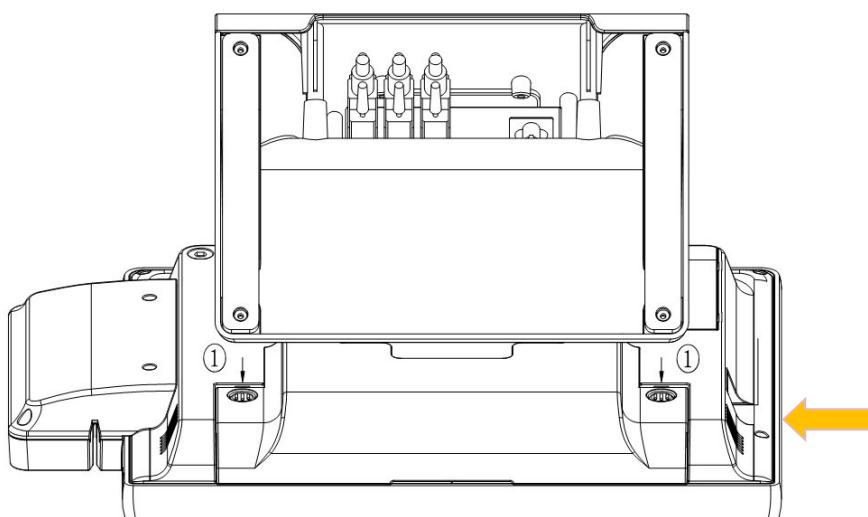

Figure 19. Cable cover

B. Pull out the cable cover

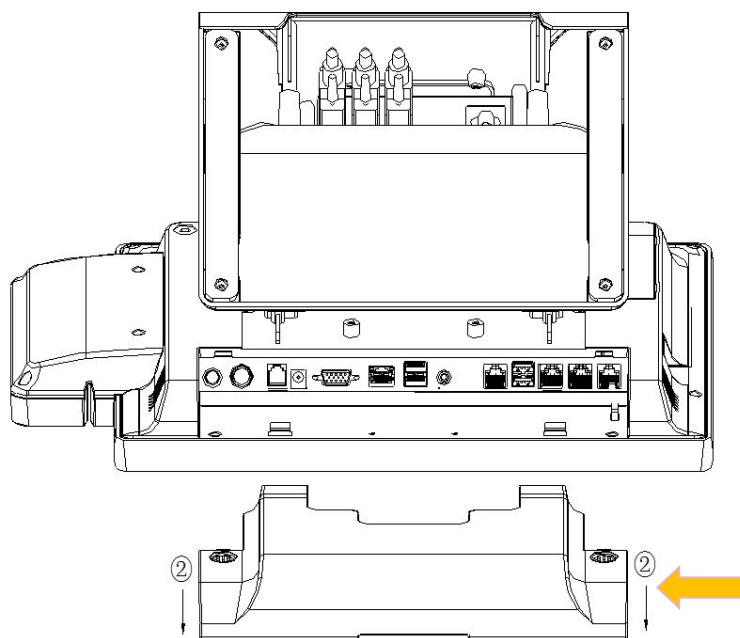

Figure 20. Cable cover that's detached

3 Remove the multi-function card reader

- A. Release the two screws.
- B. Pull off the cable terminal and remove the multifunction card reader.

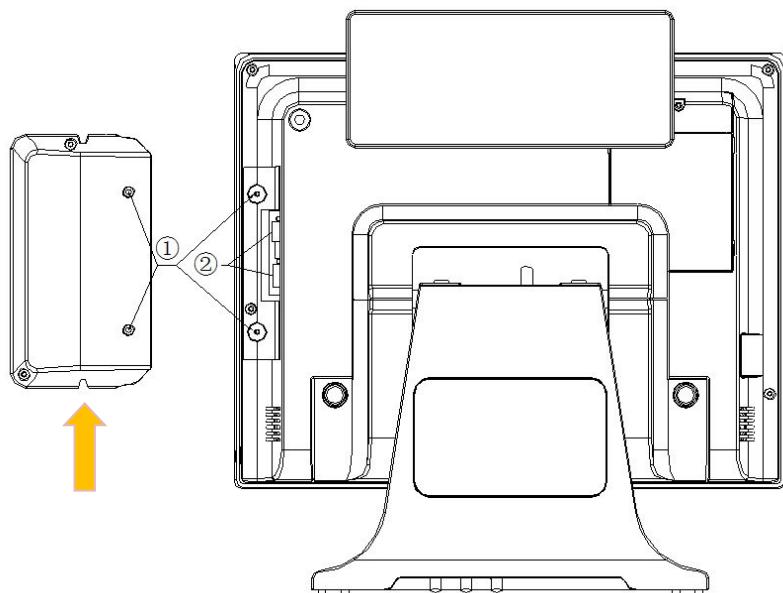

Figure 21. Multi-function card reader

4 Remove the customer display

- A. Rotate the customer display to the horizontal position.

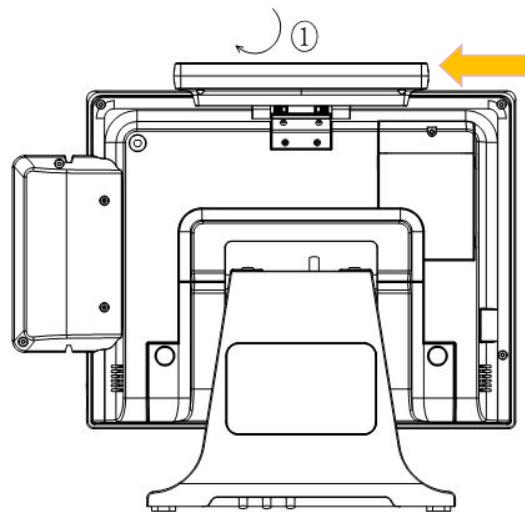

Figure 22. Rotated customer display

- B. Release the two screws.
- C. Pull off the cable terminal and remove the customer display.

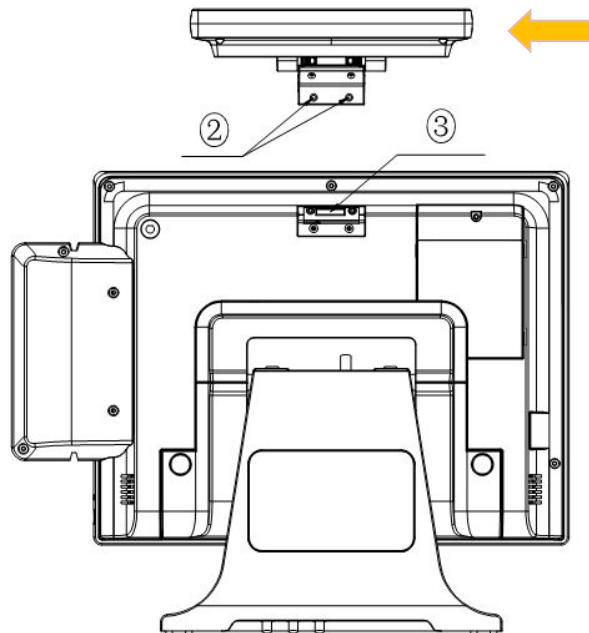

Figure 23. Second display

5 Remove the second display

- A. Press the switch and pull out the cable cover.

Figure 24. Switch to pull out the cable cover

- B. Release the two tool-less screws.
- C. Rotate and pull the second display.

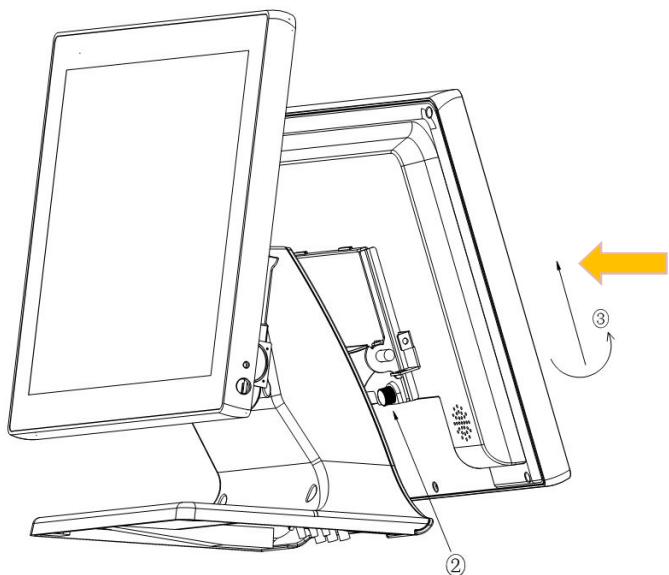

Figure 25. Second display that's rotated

Section 7. Product Specifications

HK870 series Specifications

Table 23. HK870 Specifications

Item		Description
Model		HK870
System	CPU	Intel® Atom D2550 Dual Core, clock speed 1.86 GHz, TDP 10W
	Memory	DDRIII 2G (Up to 4G)
LCD Touch Panel	LCD Size	15 inch
	Brightness	400 cd/m ²
	Resolution	1024×768
	Touch Screen	5 wire resistive true flat touch (single touch) True flat projected capacitive technology (optional)
Storage	HDD	HDD SATA 2.5 inch (320Gb Standard)
	SSD	SATA 32Gb SSD (larger capacity optional)
		MSATA 64Gb SSD (larger capacity optional)
I/O Ports	Serial Ports	3* standard RS-232 COM; (COM4 is alternative to OPOS customer display, COM4 with 5V/12V power.) COM3 is alternative to 5V power (COM3 without power default)
	USB	6 * USB 2.0 (2 Front, 4 Rear)
	VGA	1 * VGA reserved for 2nd display
	LAN	1 * RJ-45 (1000Mbps Gigabit LAN)
	Audio	1 Line-out +1MIC
	Cash Drawer	1 * RJ-11 24V for cash drawer
	PS/2	1
	DC 12V out	1
Power	Power Adapter	Adapter (DC 12V, 7A)
Peripheral	MSR	3 Tracks (USB)

	Fingerprint Reader	Digital Personal module / USB
	RFID	RFID Reader (USB, option)
	IC Card	Smart Card Reader (USB, option)
	Customer Display	2×20 characters VFD
		15" TFT LCD display
Environment	Operating Temperature	5°C - 40°C
	Operating Humidity	40% - 90%

	Audio	1 Line-out

	Cash Drawer	1 * RJ-11 24V for cash drawer
	PS/2	1
	DC 12V out	1
Power	Power Adapter	Adapter (DC 24V, 3.75A)
Peripheral	MSR	3 Tracks (USB)
	Fingerprint Reader	Digital Personal module / USB
	RFID	RFID Reader (USB, option)
	IC Card	Smart Card Reader (USB, option)
	Customer Display	2×20 characters VFD 15" TFT LCD display
Environment	Operating Temperature	5°C - 40°C
	Operating Humidity	40% - 90%

Appendix A. Basic Input and Output System (BIOS)

Set Up Information

This section provides information about the Basic Input and Output System (BIOS) that will drive the main board.

Understanding BIOS

Basic Input and Output System (BIOS) provides configuration and set-up information for driving the main board. BIOS values are saved in CMOS ROM on the main board. **BIOS Set-Up** is a menu-oriented software utility which enables a user to configure the system's environmental set-up, system hardware, power saving functions, etc. BIOS Set-Up values can seriously affect how the system works. Therefore, users should determine all options regarding BIOS Set-Up and configure the system accordingly.

Entering the Setup for HK870 series

- Turn on the system and press [F2] to enter the SETUP screen.
- Turn on the system and press [F11] to enter the boot menu.

Scenarios of when to use a BIOS Setup

Use the BIOS setup software utility when:

- Checking HDD type and capacity after HDD replacement
- Changing the booting sequence
- Reflecting the users need on the setup

Appendix B. Input/Output Information

This section provides input/output information for the **HK870 All-in-One POS System**.
